Education

University of Washington — Seattle, WA
B.S. Computer Science and Systems, Minor in Aeronautics and Aerospace — *Expected June 2027*

Tacoma Community College — Tacoma, WA
A.A. Computer Science, GPA 3.9 — *2020 – 2022*

Year Up — Seattle, WA
Technical Project Management Program — *Sep 2024*

Experience

Software Developer Intern — Jul 2025 – Present
University of Washington – Tech Startup Club — *Seattle, WA*

- Develop and maintain a web application for UW administrative staff from requirements to deployment using Go, TypeScript, PostgreSQL and AWS
- Own the product backlog in Jira, turning stakeholder needs into technical requirements and user stories
- Serve as Scrum Master, facilitating sprint ceremonies and coordinating development work in an Agile team

Security / Onsite IT Support — Sep 2024 – Jan 2025
Blue Origin — *Kent, WA*

- Architected and deployed an internal web application integrated with proprietary access-control systems, serving **25,000+ employees** nationwide
- Provided overnight IT support for facility infrastructure, troubleshooting issues to minimize downtime
- Monitored real-time security systems across multiple sites for safety and compliance

Contract Specialist Intern II — Mar 2023 – Dec 2023
King County Procurement Office — *Seattle, WA*

- Led **4 interns** to build a compliance database from scratch, reaching full regulatory compliance in **3 months**
- Independently drafted and approved **600+ procurement contracts** with zero compliance issues
- Designed a new onboarding process that cut ramp-up time from **2 months to 3 weeks**

Projects

Shitbox Rally | *Godot 4, GDScript, Jolt Physics, C++, Steamworks* — Public release

- Built a rally game's vehicle physics from scratch: raycast suspension, slip-based tire model, simulated clutch, gearboxes and differentials across **60 cars**
- Procedurally generated stages (0.5–20 km) across 5 biomes and **14 road surfaces**; online multiplayer via Steam lobbies with proximity voice
- Wrote a headless C++ tool on the open-source Engine Simulator to dyno-test engines and record sound loops

WA Commute Crash Risk | *JavaScript, Leaflet, Open Data APIs, Statistics* — Live

- Mapped every fatal WA traffic crash 2010–2024 (NHTSA data); routes a commute and flags its deadliest miles
- Grades alternate routes, adjusting for road type, crash history, time of day, weather and driver habits

ApplyBot | *Python, LLM APIs, Playwright, SQLite, MCP* — In progress

- Pulls postings from Greenhouse, Lever and Ashby, scores fit, tailors truthful one-page resumes and auto-fills forms

Technical Skills

Languages: C++, C#, Python, Go, TypeScript, JavaScript, Java, SQL, GDScript
Frameworks & Engines: Godot 4, Unreal Engine 4/5, Jolt Physics, Node.js, Leaflet, Steamworks
Tools & Cloud: Git/GitHub, AWS, PostgreSQL, Linux, Jira, Blender
Practices: Agile/Scrum, Requirements Gathering, Networking & Replication, Physics Simulation
Certifications: AWS Certified Cloud Practitioner, Scrum.org Certified Scrum Master
